

Principle Verifier

```
graph BT; U1[Unconfirmed] --> C[Confirmed]; I[Illegal] --> U2[Unconfirmed]; C --> PV[Principle Verifier]; U2 --> PV;
```

The diagram illustrates a verification process. At the bottom, there are two initial states: 'Unconfirmed' (yellow box) on the left and 'Illegal' (red box) on the right. An arrow points from the 'Unconfirmed' box to a 'Confirmed' box (green). Another arrow points from the 'Illegal' box to an 'Unconfirmed' box (yellow). From both the 'Confirmed' and the second 'Unconfirmed' box, arrows point upwards to a 'Principle Verifier' box (green) at the top.

Confirmed
