

Principle Verifier

```
graph BT; U1[Unconfirmed] --> C[Confirmed]; U2[Unconfirmed] --> C; C --> PV[Principle Verifier];
```

The diagram illustrates a verification process. At the base, there are two 'Unconfirmed' states: one in a yellow box on the left and one in a dark red box on the right. Arrows from both point upwards to a green 'Confirmed' box. From the 'Confirmed' box, an arrow points upwards to a green 'Principle Verifier' box at the top.
